

CREATE NODE RED SERVICES

Date	10 November 2022
Team ID	PNT2022TMID06832
Project Name	Industry-Specific Intelligent Fire Management System

The screenshot displays the IBM Cloud Foundry console interface for a service named "Node RED DWGIW 2022-11-12". The service is in a "Running" state. The left sidebar contains navigation links: "Getting started", "Overview" (selected), "Runtime", "Connections", "Logs", "API Management", and "Autoscaling".

The main content area includes a notification banner: "IBM Cloud Foundry Public is being deprecated. Please see full details." Below this, the "Instances" section shows a health status of "100%" and "1/1 instance(s) are running". It features a slider for "MB memory per instance" ranging from 0 to 2048, with the current value set to 256. A "Runtime" section displays a donut chart for "Node.js" showing a "Total MB allocation" of 256, with 1.75 GB still available. The "Connections (1)" section is partially visible at the bottom right.
