Write code and connections in wokwi for ultrasonic sensor.

Whenever distance is less than 100 cms send "alert" to ibm cloud and display in device recent events.

IBM OUTPUT :

The screenshot displays the IBM Watson IoT Platform interface. The top navigation bar includes the platform name, a search icon, and user information (purni1812@gmail.com, ID: jescj). The left sidebar contains various icons for navigation. The main content area shows a list of devices, with the 'BME280_Sensor' selected. The device status is 'Connected', and the controller is 'ESP32_Controller'. The 'Recent Events' tab is active, showing a table of data events.
